SELECT from WORLD Tutorial

Language: English | 日本語 | 中国

name	continent	area	population	gdp
Afghanistan	Asia	652230	25500100	20343000000
Albania	Europe	28748	2821719	12960000000
Algeria	Africa	2381741	37100000	188681000000
Andorra	Europe	468	78115	3712000000
Angola	Africa	1246700	20609294	100990000000

In this tutorial you will use the SELECT command on the table `world`:

Contents [hide]

1 Introduction
2 Large Countries
3 Per capita GDP
4 Error creating thumbnail: File missing Coding Ninja
5 South America In millions
6 France, Germany, Italy
7 United
8 Two ways to be big
9 One or the other (but not both)
10 Rounding
11 Trillion dollar economies
12 Name and capital have the same length
13 Matching name and capital
14 All the vowels
15 What Next

SELECT basics
SELECT from WORLD
SELECT from nobel
SELECT from nobel tutorial
SELECT name, population FROM world WHERE name IN ('Cuba', 'Germany', 'China') ORDER BY name
