Portable audio player **FiiO M3 Pro** (https://www.fiio.com/m3_pro)

Functionality: support of a large number of audio formats, including rarely used and specialized ones.

Reliability: correct operation in the temperature range -15°...+35°C.

Usability: the presence of four physical buttons makes it possible to control some functions of the player blindly.

Efficiency: depending on the type of file being played, as well as on the selected volume level, the player's operating time on a full battery charge is 6-16 hours.

Maintainability: the common USB-C connector is used for charging the battery, working with files, as well as for using the player as an external DAC.

Portability: to work with files, the player does not require installation of additional software, it is recognized by the OS (Windows and Linux family) as a regular USB drive.
